Vibration Massage therapy is a hot new beauty technology & has been a sensation in skin care devices. For years women have been using their fingers to help products work better and optimize their effectiveness. Now our skin science laboratory using state of the art technology has developed a breakthrough skin care machine: **The Skin Spa Supercharger**. It can do what is impossible to do manually. The Skin Spa Supercharger gently vibrates approximately *7000 times per minute*, consistently, with the same intensity.

- This is a multipurpose device. It can be used with uplifting, super hydrating, anti-oxidant & anti-wrinkle products for more efficient penetration onto the skin.
- When the skin is warmed up by the vibration/massaging action, it helps to provide a more efficient, even absorption of topically applied serums, lotions, gels and creams onto the skin.
- Temporarily improves localized blood circulation to the surface of the skin as it massages the skin.
- The gentle vibrating/massaging action on the skin's surface temporarily improves the appearance of the skin.
- Rejuvenates the look of a tired complexion.
- Skin feels invigorated and looks more radiant and youthful.
- The Skin Spa Supercharger is a registered medical device as a therapeutic massager.

Using the Supercharger

Think of your face and neck in sections. You want to massage every section. Start on left side and repeat on right. Do each movement 2 to 3 times on each side, approximately 5 seconds per movement.

1. Neck & Jawline
Place massage head above collarbone & slowly slide upwards, past jawline with light pressure.

2. Jawline & Lower Cheek
Place massage head on jawline & slowly slide upwards, with light pressure, ending at top of cheekbone.

3. Lower Cheek to Temple
Place massage head under side of nose & slowly slide upward & out with light pressure ending at temple.

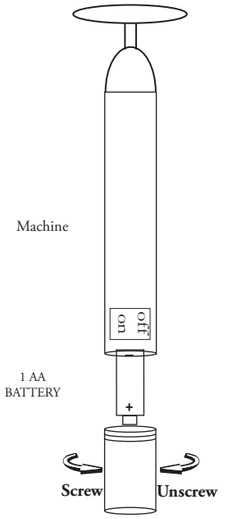
4. Upper & Lower Mouth Area
Lower Mouth Area: Place massage head on side of chin and slowly, with light pressure, slide upwards to under nose.
Upper Mouth Area: Place massage head on side of mouth and slowly, with light pressure slide upwards to bottom of nose.

5. Under Eye Area
Place massage head on the side of your nose, under your lower lashes & slowly, with light pressure slide out to temple.
Common Sense Cautions: Avoid direct contact with eye.

6. Between Eyebrows
Place massage head between brows & slowly with light pressure slide upwards to hairline.

7. Forehead
A. Place massage head in middle of forehead slightly above brows. With light pressure, slowly slide out towards temple.
B. Place massage head above brows. With light pressure, slowly slide upwards toward hairline. Repeat this movement from left to right.

Battery Installation



Unscrew cap by turning counter- clockwise. Remove shrinkwrap from battery. Place battery inside machine. Turn clockwise to close.

Important: Please read all instructions before use.

Warnings: Not intended for use on children.

Do Not submerge in water.

Do Not use if massage head appears damaged.

To Clean: Wipe massage head with dry cloth or tissue.

Dispose of Battery: Please dispose of properly after use.
